## MODULAR BROADCAST CONTENT ARCHIVING

## ATMOSPHERE B2B MEDIA CLOUD - CORE SYSTEM

The Atmosphere B2B Media Cloud is a highly flexible and modular system designed for TV and broadcasting content archiving. Our Core System provides a comprehensive suite of features and benefits to help you store, manage, organize and share your media files with ease - expandable with many available modules.

### KEY FEATURES

- Media Hub Manager - store, organize and share content of all file types

- Easy categorization, tagging and organization of content in Media Hub Items

- Individual User & Role Management

- B2B Taker & Customer Frontend including download cart, editorial lists, file manager, FTP and share functionality

- With our Page Builder you can easily create and customize landing pages

- Innovative and intelligent search functionality based on AI and automated tagging

### BENEFITS

- We provide a flexible deployment model, deploy the system on a single server, AWS or Azure to achieve maximum flexibility in terms of storage capacity and performance

- Choose between a fixed price or a flexible pricing model and we will evaluate the right platform to meet your needs

- Our system is designed to help you organize and manage your content, saving time and reducing operational costs

- We provide the latest security protocols and encryption technologies to keep your data safe and secure
