

DELIVER, IMMEDIATELY, ANY CONTENT

DISTRIBUTE TO STAKEHOLDERS & SPONSORS

ATMOSPHERE MODULE - CLOUD CONTENT DISTRIBUTOR

Introducing the Atmosphere Cloud Content Distributor - it's a powerful tool designed to deliver content to various partners, sponsors and other stakeholders as quickly as possible. With its centralized distribution system and customizable email templates, users can efficiently manage recipient lists, since in today's fast-paced media environment speed is essential to stay ahead of the competition.

KEY FEATURES

- Real-time highlight distribution with a simplified distribution process, all integrated and part of the B2B Media Cloud
- Easy and fast sorting with the help of distribution lists created by the user, tailored for fast collaboration with editors and creators
- Mailinglists & Recipients Management to control which type of content your audience should receive

BENEFITS

- Enables faster distribution of clips and highlights - saving time and effort which is required for fast content delivery
- Consistency: Thanks to templates and pre-defined lists, the module allows users to stay continuous
- Seamless integration with Atmosphere B2B Media Cloud for a complete media management solution
